I am a truck driver and drive state-to-state during the week. I depend on my satellite radio heavily to provide me with up-to-the minute weather and traffic reports. It has helped me to avoid traffic delays numerous times. My only company at night is my satellite radio, and I thoroughly enjoy the variety of commercial-free music that is played - songs that you cannot hear on a regular radio anymore. I cannot imagine traveling without my XM radio as it is the only company I have. The information and music available through this satellite system is unlike any other broadcasting system around. I respectfully request that you reject the NAB's Petition 04-160, and let those that truly enjoy this unique programming CONTINUE to enjoy it. After all, we are willing to pay for it - it's not as though we are requesting a free service. This is supposed to be the land of opportunity and freedom, yet we are fighting to keep a service that is not harming anyone, and that we are PAYING for.....let whoever is pushing this petition go spend their time pushing a petition that will make a life or death difference.
